

WOCHENBULLETIN

Mon 25.11.2024 14:00 ETH Zürich, Hönggerberg
HIT E 41.1
Host: Marinkovic

Seminar in Theoretical Physics

Pietro Rescigno (Uni. Milano-Bicocca)

"The non-static screening spectrum of high temperature QCD"

Mon 25.11.2024 14:00 ETH Zürich, Hönggerberg
HIT K 51
Host: Maccari

Seminar in Theoretical Physics

Somesh Chandra Ganguli (Aalto University, Espoo, Finland)

"Visualization of designer quantum matter at the atomic scale"

Mon 25.11.2024 16:00 ETH Zürich, Hönggerberg
HPF G 6
Host: Prof. Atac Imamoglu

Condensed Matter Seminar

Prof. Simone De Liberato (University of Southampton, Southampton, UK)

"Nonlocality and electrical generation of phonon polaritons"

Wed 27.11.2024 14:00 ETH Zürich, Hönggerberg
HPK D 24.2
Host: Christl

Ion Beam Physics Seminar

Benedict Mittelbach (ETHZ, D-Usys)

"Understanding the Swiss freshwater carbon sink using radiocarbon"

<https://ams.ethz.ch/education/seminar/program.html/link>

Wed 27.11.2024 16:15 ETH Zürich, Hönggerberg
Aperitif served after the talk HPV G 4
Host: Esslinger

The Zurich Physics Colloquium

Francesca Ferlaino (Institut für Experimentalphysik, Universität Innsbruck)

"Supersolidity with long-range-interacting magnetic atoms"

<https://colloquium.phys.ethz.ch/link>
